REUEL COMES TO CPR - PERFORMS LEATHER MAGIC!

Reuel Atkinson, principle in *Artisan Company*, located in Virginia, spent last Thursday and Friday, Deep Cleaning, Conditioning, and Refinishing, the original leather interior components on a customer's 1969 911S. Reuel tells me that there are a couple good over-the-counter leather care products available. Most of these retail products over promise results, and have chemistry concepts that Reuel does not agree with.

Periodically, a good Deep Cleaning and Conditioning of leather should be done to a

higher level than is available with auto care products. Conditioning leather is a crucial element in keeping it soft and pliable, and help minimize some existing forms of cracking. Deep Cleaning precedes the Conditioning process. Refinishing is necessary when the color “finish” wears off the leather.

Contact Reuel at 757 - 377 - 3214 or artisancotech@gmail.com. He is always available to discuss your leather restoration needs. Reuel will be present in upcoming CPR eLetters providing you with Leather Care Tips.

CLEAR FILM NOW A REALITY AT CPR.

What is Clear Film and why should you care? Clear Film is a “clear” paint protector applied over the painted portions of your vehicle. The Film prevents chipping or abrasions to your car's paint. The film is self healing, if abraided or scratched. Washing and exposure to the sun causes the film to ‘reflow’ to a clear smooth finish. Realistically, the film is good - but it is not a miracle. If it is cut deeply or lifted by damage, the film will need to be replaced. It will prevent most all of the damage to the paint that occurs during driving on the road. You will still have to avoid getting behind a dump truck hauling gravel.

The film can be installed in just those areas that experience the most exposure to road debris, or the entire vehicle. Our film supplier also has protective film for glass. Yes, if you look closely, you will be able to see where the film begins or ends if the entire panel is not covered. You will have to look pretty hard to see it though.

Aaron Alvino, CPR’s head painter, resisted “protective film” for years until this product came out. Aaron could not find any downside

to this product. Aaron was so taken with the product he volunteered to be the factory trained “film guy”.

Here is Aaron’s latest project. You may recognize the Porsche. It now has a full hood wrap and protective film under the head lights.

Aaron will also be performing Paint Correction, Ceramic Coatings.

A “Track Coating” will soon be available. One that you install on track days. Cool stuff!
Call Aaron concerning any of these products, 410 822 8322,

CHROME CITY RIDE *at* THE BENEDICTINE SCHOOL

This is the premier Eastern Shore Event. On **July 28, 2019**, the Benedictine School in Ridgely, Maryland will host its 18th annual Chrome City Ride. Open to all cars and motorcycles. benschool.org.

What makes this event “premier”? First, all proceeds benefit the Special Needs Students that call The Benedictine School their home. Benedictine School has, for 50 years, been helping children and adults with Development Disabilities. Chrome City Ride is held on the Benedictine Campus. It is an all-day event, with live entertainment, drawings, free lunch and Tee Shirt to participants, plus more.

Second, the structure of the Event provides so much more than the average Car, Motorcycle Show. HOW? Each participant can Register at numerous designated Remote sites located around the State of Maryland, or at the School itself. At each remote registration site, participants, at a designated time, will begin an escorted driving tour from the site directly to the School Campus. This is an impressive driving tour - not only to observe, but to be a part of. Motorcycles and Cars in each tour enter the Campus in a parade fashion. Very cool!

CPR is just one Registration Site. But CPR always makes sure the day and Chrome City Ride Party begins with us.
